Spring 2013

**Assignment 04 I I Feedback**

Andrew Kowalczyk

**All of Time and Space**

*3b* — You did a great job with tracking down your selected papers and recording their connections and differences. And hey, a little heritage acknowledgment in the case of Szymanski, as you have shown, can be both affirming and fun :) Do watch out for typos though; I fixed some of them, but probably not all. (+)

*4d* — Excellent work with finding papers from the digital library. (+)

*4e* — Your commits and messages were very appropriate given the work performed. (+)

*4f* — Submitted on time. (+)

**The Dining Philosophers Problem**

*2d* — Well, you certainly have a good start...journey of a thousand steps and all that...999 to go! >:-) (-)

*4a* — Yay definitions. Now for more code. (-)

*4b* — You have put your relevant definitions together in a single file—good. These definitions will likely be needed by multiple pieces of code though, so a more appropriate extension for this is *.h* and not *.c* (/)

*4c* — Extremely readable code! Just wish there were more of it. (/)

*4d* — Yes, you have a little bit more research to do for this one. (/)

*4e* — I guess the sole commit and message are indeed appropriate for 4 lines of code :) I know that you have much more to do but for this one I will assume that you will keep up the good habit. (+)

*4f* — 1 out of 1000 steps submitted on time. (/)
