OPERATING SYSTEMS
Spring 2013

Assignment 0423 Feedback

Andrew Kowalczyk

1b — You have successfully added to your knowledge of how operating systems manage memory. (**+**)

2d — You correctly implemented paged address translation. (**+**)

4a — Your code is functionally correct. (**+**)

4b — Your generally maintained the separation of concerns provided by the given code, including good use of the already `#defined` macros (which makes your code more adaptable to different paged memory configurations). (**+**)

4c — Your code is quite readable overall. One readability-related tweak is the convention to always enclose blocks of code in curly braces, even if they consist of a single statement. That makes all conditionals and loops look consistent, plus makes it easier to expand them in case you do need to add more statements to those blocks. But…the tabs! The tabs!!! Just for that, we must issue a… (**/**)

4d — Your successful implementation shows good use of available resources. (**+**)

4e — Your commit frequency and messages are appropriate and descriptive, respectively, for the work that was done. (**+**)

4f — Submitted [very much] on time. (**+**)
